Statement of Purpose

Curiosity has always been at the centre of my learning. What began as a simple interest in understanding how digital systems function gradually evolved into a deeper engagement with computer science as a discipline. Over time, I have come to realize that the true value of this field lies not just in building solutions, but in the process of thinking—questioning assumptions, exploring alternatives, and refining ideas until they become meaningful and effective.

As an undergraduate student in Computer Science and Engineering, my academic journey has provided me with a strong grounding in core subjects such as data structures, computer networks, and programming. However, beyond textbooks and examinations, I have consistently felt the need to go a step further—to connect theoretical concepts with real-world applications. It is in this pursuit that I have actively engaged in problem-solving, explored different approaches to coding tasks, and developed a growing appreciation for structured and efficient thinking.

The Summer Internship (TTS project) at NIT Calicut represents, to me, an important opportunity to transition from guided learning to a more exploratory and application-oriented environment. What particularly attracts me to this program is the emphasis on working under mentorship while also being encouraged to think independently. I believe that such an environment is essential for developing not just technical competence, but also clarity of thought and confidence in approaching unfamiliar problems.

I am especially interested in gaining hands-on experience through a project that challenges me to apply my existing knowledge while also pushing me to learn new concepts. Whether it involves software development, data analysis, or another technical domain, I am eager to understand the underlying principles and contribute meaningfully to the work being carried out. I see this internship not as a short-term engagement, but as a formative experience that will influence how I approach learning and problem-solving in the future.

Beyond academics, I consider myself someone who values consistency and patience. I am comfortable with the idea that understanding takes time, and I am willing to put in the effort required to arrive at clarity. I approach challenges with a problem-solving mindset and try to remain adaptable when things do not go as expected. I also value collaboration, as working with others often brings new perspectives that deepen understanding and improve outcomes.

One of the key reasons I am drawn to NIT Calicut is its academic environment, which I perceive as both rigorous and supportive. Being part of such

a setting would allow me to interact with individuals who share a similar passion for learning, while also benefiting from the guidance of experienced faculty members. I am particularly keen on experiencing a research-oriented approach, where the focus is not just on arriving at answers, but on understanding the process that leads to them.

Looking ahead, I aspire to build a career in technology where I can contribute to developing solutions that are both efficient and meaningful. At this stage, I am less focused on a specific specialization and more interested in building a strong foundation, exploring different domains, and understanding where my strengths and interests align. I believe that exposure to a structured internship like the TTS program will play a crucial role in shaping this direction.

In essence, this application reflects my intent to learn, to explore, and to grow. I am eager to step into an environment that challenges me intellectually and helps me refine my approach to both learning and problem-solving. I would be grateful for the opportunity to be a part of the Summer Internship program at NIT Calicut, and I am committed to making the most of this experience.

Sincerely,

Priyadarshini A S,

B.E., Computer Science & Engineering,

Sri Eshwar College of Engineering.

EDUCATION

COLLEGE EDUCATION - Sri Eshwar College of Engineering	CGPA:8.58 (Upto 3 rd sem)	2024-2028
SCHOOLING - Spring Valley School (CBSE), Calicut	91%	2023-2024
SCHOOLING - Spring Valley School (CBSE), Calicut	96.8%	2021-2022

INTERNSHIPS

Data Analytics & AI Intern National Institute of Electronics & Information Technology, Calicut	2025
Completed a 4-week internship in Data Analytics and AI at NIELIT, gaining hands-on experience in data preprocessing, EDA, and applying AI techniques to real-world datasets, strengthening my analytical and data-driven problem-solving skills.	

Skills Acquired: Python for Data Analytics, Pandas, NumPy, Data Cleaning, Data Visualization, ML Fundamentals, Model Evaluation, AI Basics, Analytical Thinking, Real-world Dataset Handling.

PROJECTS

Sentiment Analysis on Indian Education Policies	GitHub	2025
Developed a sentiment analysis system to analyze public opinion on Indian education policies using data analytics and natural language processing techniques. The project involved data preprocessing, text analysis, and interpretation of sentiment trends to derive meaningful insights from real-world textual data.		
Tech Stack: Python, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, Google RSS Feeds, Colab		
TypeBiometric – An AI based model to detect typing patterns	GitHub	2025
Developed an AI-enabled Typing Pattern Biometric System that analyzes keystroke dynamics (key-down, hold time, release time) to detect unauthorized users and prevent third-party access to sensitive information.		
Tech Stack: Python, Pandas, NumPy, Scikit-learn, Machine Learning Algorithms, Google Colab		
LifeLink – A Blood Donors' Network	GitHub	2024
Developed a web-based Blood Donor Network that connects donors and recipients by matching blood group and location, enabling quick emergency blood requests and efficient communication. The platform features a secure, user-friendly interface to streamline the donation process and ensure reliable access to critical resources.		
Tech Stack: HTML, CSS, JavaScript, React.js, Node.js
