

Interview Experience Portal– Requirement Document

System Overview

The platform will consist of two separate portals:

1. Admin Portal

- Manage interview experiences
- Approve / reject submissions
- Edit or remove inappropriate content
- Manage company list and roles

2. User Portal

- Submit interview experiences
 - Browse and learn from existing experiences
-

User Input Requirements (Interview Submission Form)

1. Company Name

- Dropdown selection (predefined list)
 - Option to add a new company if not listed
-

2. Role Applied For

- Examples: SDE, SRE, MLOps, Frontend Developer, Backend Engineer
-

3. Candidate Experience

- Number of years of experience of the candidate
-

4. Interview Process Overview

- A short summary (3–4 lines) describing the overall interview process
-

5. Topics Covered in Interview

Structured input for better clarity:

- **DSA:** (e.g., Arrays, Dynamic Programming, Graphs)
 - **HLD (High-Level Design):** (e.g., Caching, Scalability, System Design)
 - **LLD (Low-Level Design):** (e.g., SOLID Principles, Design Patterns)
-

6. Interview Rounds Details

- Each round should be represented as an individual section/card
- Dynamic addition of rounds (e.g., Round 1, Round 2, etc.)

Each round should include:

- Round title (e.g., Coding Round, System Design Round)
- Questions asked
- Code solution (text/code editor support)

- Explanation of solution
- Optional: Video explanation upload/link

Example:

If a candidate had 5 rounds → 5 separate round cards should be displayed

7. Final Verdict

- Selected / Rejected
-

8. Candidate Advice (Optional)

- Suggestions or guidance for future candidates
-

UI/UX Expectations

- Clean and structured layout
 - Easy-to-read sections for each interview
 - Expandable/collapsible round details
 - Code blocks with proper formatting
 - Optional video embedding support
-

Admin Controls

- Approve/reject submissions
- Edit content
- Delete inappropriate entries

- Manage company and role dropdown data
